Aplicant argues that Alperovich does not disclose allowing a subscriber to be located and that the Alperovich discloses only providing a dispach system in a cellular radio telephone system. However, Alperovich discloses a method for allowing a subscriber to be located by allowingthe molbile station to be tracked when moving to different location areas. As the mobile station changes location the information in the VLR is updated, thus allowing the mobile station to be located, so that the correct MSC to provide service.

Applicant argues that D'Angelo does not discloses method fore the ability or the need for the communication server to determin a geographic location. However, the communication server updates the location information when the location of the user changes, which allows a user to be located when contact is requested.

Applicant argues that neither reference, D'Angelo nor Alperovich disclose handling/providing location based services. However, a location-based service is interpreted to mean a service that is provided based on location. Both D'Angelo and Alperovich disclose providing a service based on the location for the user.
